Top Skills

OpenCV
Computer Vision
EasyOCR

Certifications

Intro to Machine Learning
Oracle Cloud Infrastructure 2025
Certified AI Foundations Associate
Pandas
Data Visualization
Oracle Cloud Infrastructure 2025
Certified Generative AI Professional

Aryan Singh

CS @ VIT'26 | Building RAG & Agentic AI Systems | ML/DL |
Computer Vision | Data Science
Greater Surat Area

Summary

I build AI systems that reason and act, from RAG pipelines to multi-agent workflows. I like picking unconventional problems: forecasting Delhi bus route demand with transformers and GTFS data, detecting sleep apnea from tracheal audio using cross-modal transformers, and building an autonomous music-discovery bot with vector similarity search. I've worked on both sides of applied AI: building agentic document-processing pipelines with LangGraph and CrewAI (cutting hallucination rates through better vector indexing), and engineering real-time computer vision models for low-light object detection. Currently exploring: agentic orchestration, RAG systems, and where ML meets real-world data (GIS, transit, health). Open to AI/ML engineering, data science, and analyst roles. Tools: PyTorch, TensorFlow, LangGraph, CrewAI, Transformers, Pinecone, AWS/Azure, SQL, GeoPandas

Experience

Beans.ai

Artificial Intelligence Intern

January 2026 - March 2026 (3 months)

- Developed a lightweight OCR script in Python (Tesseract, EasyOCR) to read unit numbers from driver photos.
- Applied OpenCV preprocessing (grayscale, thresholding, denoising) to improve accuracy in low-light photos.
- Labelled and organised spatial point-of-interest (POI) image datasets used by the team to train detection models.
- Validated extracted text against internal geocoded databases to verify entrance and apartment locations.

Beans.ai

Artificial Intelligence Intern

May 2025 - July 2025 (3 months)

- Built a RAG pipeline with LangChain and ChromaDB to answer drivers' plain-English questions on building access rules.
- Preprocessed and chunked thousands of unstructured delivery notes, gate manuals, and property FAQs into vector embeddings.
- Implemented semantic similarity search to return the right building guideline, reducing incorrect access attempts.
- Tested and evaluated prompt templates across open-source LLMs to cut hallucinations and keep answers short for drivers.

VIT_Animation

Design Head

June 2024 - December 2024 (7 months)

Vellore

Smart Valyou Pte. Ltd.

Frontend intern

June 2024 - July 2024 (2 months)

Designed and implemented a UI/UX prototype for web pages using Figma and Material UI, reducing

design iteration time by 20% through optimized layout and user flow.

- Built a dynamic React-based dashboard with React-Grid-Layout, resulting in a 25% faster data presentation.

Education

Vellore Institute of Technology

Bachelor's degree, Computer Science · (2022 - 2026)

The Army Public School, Dhaula Kuan, New Delhi

· (April 2017 - March 2022)

Delhi Public School Bhopal

· (April 2009 - March 2017)
